

Why m.a.r.c ?

We are flexible Our approach is to always adjust our inventories to your needs and your ship's sailing schedule.

We are efficient With a highly trained and experienced team operating worldwide, we offer cost efficiency and pragmatism. More than once our agency has resolved unexpected asbestos incidents on board. In all cases we ensured that the incident did not cause delays.

We are certified Van de poel | m.a.r.c. is a government approved agency and recognized by the Dutch flag state to carry out asbestos inventories on newly built ships. All our IHM's and asbestos inventories are in line with IMO requirements and EU regulations.

Global experts

van de poel I m.a.r.c is your leading expert on hazardous materials on board ships and at offshore facilities. We are a global supplier of IHM's and asbestos inventories. We act as consultants, trainers and surveyors. Our agency has been the preferred supplier for asbestos inventories and IHM's for several leading companies in the maritime and off shore industry since 2001.

All our IHM's and asbestos inventories are in line with IMO requirements and can be carried out by us in all stages of a ship's life cycle.

Our team of highly trained and certified experts operates worldwide: from China to Mexico, from South Africa to Norway.

van de poel I m.a.r.c is an associated member of ISRA.

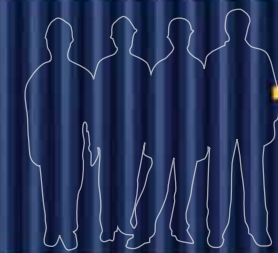

Are you ready for the future?

No ship owner likes to be banned from ports or be faced with unexpected delays, lose charter or receive liability claims. Our IMO HazMat Survey and asbestos inventories help you prevent such unwanted situations. An Inventory of Hazardous Materials, in short IHM, is nowadays elementary. Due to EU regulations for ship recycling, ships larger than 500 GT will be required to maintain an IHM. This inventory identifies, locates and lists all hazardous material on your ship. An IHM is not just a necessity but also comes in handy when dealing with liability issues or simply to be able to proof (to subcontractors, crew and others) that your ship is free of asbestos or other hazardous materials.

van de poel I m.a.r.c helps you prepare for future requirements on hazardous materials.

Recycle right!

We care about people and the environment. Therefore we assist ship owners and fleet managers in achieving a smooth recycling process. We can advise you on various issues concerning ship recycling, such as how to deal with ships containing asbestos, how to ensure safety on board, how to develop good waste management procedures, how to select recycling yards and how to meet your obligations to authorities.
